AARAV SHARMA

Backend Developer

aarav.sharma@example.com | +91 98765 43210 | Pune, India | linkedin.com/in/aarav-sharma-dev

SUMMARY

Backend developer who has spent three years building web services in Python. Comfortable with API design, relational databases and cloud deployments, and enjoys writing clean, well-tested code.

SKILLS

Languages: Python, JavaScript, SQL
Frameworks: FastAPI, Django, Flask
Databases: PostgreSQL, MySQL, Redis
Tools: Docker, Git, GitHub Actions, Linux, AWS (EC2, S3)

EXPERIENCE

Software Engineer - PayBridge Technologies, Pune (Jul 2022 - Present)

- Built REST APIs in FastAPI for a merchant payments dashboard used by 20,000 businesses.
- Designed PostgreSQL schemas and optimised slow queries, cutting report generation time by 60%.
- Packaged the microservices as Docker images and ran them on AWS EC2 behind an Nginx load balancer.
- Added unit and integration tests with pytest, raising coverage from 45% to 85%.
- Set up Prometheus alerts and Grafana dashboards to track API latency and error rates in production.
- Reviewed pull requests for a team of six engineers and mentored two interns.
- Moved payout processing to Celery workers backed by RabbitMQ.

Junior Developer - CodeCraft Solutions, Mumbai (Jun 2021 - Jun 2022)

- Developed internal tools with Django and MySQL for the operations team.
- Implemented JWT based authentication and role-based access control.
- Set up GitHub Actions pipelines that run linting and tests on every pull request.

PROJECTS

Expense Tracker API - FastAPI, PostgreSQL, Redis (2023)

- Created a multi-user expense tracking service with Redis caching and rate limiting.

Real-time Chat App - Django Channels, WebSockets (2021)

- Built a chat application supporting group rooms, typing indicators and message history.

EDUCATION

B.E. in Computer Engineering - Savitribai Phule Pune University (2017 - 2021), CGPA 8.4/10

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
