ROHAN VERMA

Python Backend Engineer

rohan.verma@example.com | +91 91234 56780 | Bengaluru, India | github.com/rohanverma

SUMMARY

Python backend engineer focused on scalable web APIs, careful PostgreSQL data modelling and dependable cloud deployments for payment products.

SKILLS

Languages: Python, SQL, Bash
Backend: FastAPI, Flask, SQLAlchemy, Celery
Data: PostgreSQL, Redis, RabbitMQ
Cloud & DevOps: Docker, AWS ECS, Git, GitHub Actions, Grafana

EXPERIENCE

Backend Engineer - Swiftpay Labs, Bengaluru (Aug 2021 - Present)

- Designed and maintained REST APIs with FastAPI serving payment workflows for 50k daily users.
- Containerised Python microservices using Docker and shipped them to AWS ECS with automated rollbacks.
- Wrote pytest suites covering billing logic and reviewed teammates' pull requests every week.
- Tuned PostgreSQL indexes and designed relational schemas for the ledger service.
- Used Redis caching and RabbitMQ queues to keep checkout latency under 200 ms.
- Created Grafana dashboards and alerts that reduced incident response time by half.

Software Developer Intern - DataNest, Pune (Jan 2021 - Jul 2021)

- Documented internal endpoints with OpenAPI and added OAuth2 login to the admin portal.

PROJECTS

Invoice Reconciliation Service - FastAPI, PostgreSQL (2022)

- Matched bank statements against invoices nightly, flagging mismatches for the finance team.

EDUCATION

B.Tech in Information Technology - VIT Pune (2017 - 2021)

CERTIFICATIONS

AWS Certified Developer - Associate (2023)
